## Don't believe everything you read...

This is an authorised derivative work based on the novel *Tooth and Claw* by Jo Walton, and its content has been approved by her, but nothing in it, other than direct quotes from the original text, should be considered to be definite canon for this setting.

Background details have been invented in areas where they were felt to be needed, and simplified to make the gaming aspects easier to handle. The only definitive source for this world is the novel itself, and it's possible that any future works by Jo Walton that use this setting may contradict the game.
